

Output:

60, 41, 16, 25, 53, 46,
42, 55, 74, 65, 63, 62,
64, 70

Pre-order:

1. Visit root
2. Left child and descendants as a subtree, & traverse it.
3. Repeat w right child

Post-order:

25, 16, 42, 46,
55, 53, 41,
62, 64, 63, 70,
65, 74, 60

In-order traversal:

1. Left child and descendants & traverse it.
2. Root
3. Right

16, 25, 41, 42, 46, 53, 55, 60, 62, 63,
64, 65, 70, 74.

def depth(node):

if node is None:

return -1

return 1 + max(depth(node.lchild), depth(node.rchild))
